Airport Manager L-DCS

Local Departure Control System

Multiple airline flights

LDCS manages multiple flights simultaneously and includes an automated reading of passenger documents (passports, identity cards, boarding passes,...)

PNL - Passenger Name List

L-DCS automatically incorporates the passenger list from **PNL** and **ADL** messages. It also allows, where appropriate, for **manual entry** of passengers.

Passenger Monitoring

All the checked-in and boarded passengers are monitored in real time. A passenger list is published showing checked-in passengers, Go-Show, No-Show, passengers with special needs.

List of bag tags is provided and flight closure form is generated.

Cabin Plan

LDCS manages passenger check-in and allows placement of passengers. The assignment of seats (seat mapping) is done by geographical choice in cabin plan or by direct entry. It also manages free seating.

Passenger Boarding

L-DCS is able to operate up to 3 BGRs simultaneously, that facilitate and accelerate the passenger boarding process. The barcoded boarding passes are read and the passenger list is printed.

Weight & Balance

With airlines agreement, LDCS generates the loadsheets.

Mobile Solution

L-DCS solution is available in mobile version.
